A lifetime of probing and wondering,  
Searching, praying, and examining,  
On a quest for form and meaning  
Of the nature of the Trinity

It’s been a special odyssey  
To comprehend this mystery,  
To gain a personal mastery  
Of God’s essential nature

I was baffled yet attracted  
And frequently reacted,  
Also powerfully impacted  
By its complexities

As I reflect in retrospect  
I detect a serious defect,  
The failure of the intellect  
To comprehend the infinite

Logic cannot measure the boundless  
Nor reason accommodate the limitless,  
How to handle the measureless  
Became for me the issue

Time and again I was taken aback  
When coming to terms with my lack  
Each time I sought to unpack  
This doctrine of the Trinity

I found the issue of special mention,  
That heavenly education  
Is given by the Spirit’s tuition,  
That understanding comes by faith

This means that revelation  
Must be allowed its intention  
To transform the mind’s dimension  
To think the thoughts of God

Reason and logic alone are sterile  
Handling spiritual things they are futile,
The Spirit of God can make them fertile
In producing true understanding

Trinity’s meaning is shown in fullness
Through the coming and work of Jesus,
His life and teachings are the genesis
Of discovering Divine togetherness

The Gospels are a facility
For engaging with the Trinity,
For there we see the unity
Of Father, Son, and Spirit

John’s Gospel and the Revelation
Are the entry points for my education,
And also for my appreciation
Of kinship with the Godhead

The grace of the Father, Son, and Spirit
The three in one, not separate,
In him I become regenerate
Incorporated into his family

The end of my search is a beginning,
Revelation comes with an underpinning
For findings of truth and new discerning
In the immensities of the Trinity

I have an affinity with the Divine
An affinity absolutely sublime,
The Three in One are mine, yes mine!
And I am his forever!
